Re: Sesko Property Abatement Project

Dear Paul:

This letter is in response to the BRC Notice of Cost Impact dated December 18, 2001.

We appreciate and understand the BRC concern for the changes in inventory, as well as to efficiency and safety concerns caused by people on-site. We recognize changes will negatively impact assumptions BRC made in developing salvage value estimates. However, we also recognize that less materials to dispose of should reduce your overall effort; therefore, reducing your disposal cost estimate.

I hope to work with you to equitably resolve cost impacts to the project. We encourage BRC to carefully inventory and document, as required by Section 1-04.6 of the Specification, any changes in quantities. We would suggest that BRC provide, during the Friday progress meeting, a summary of the items removed from the site during the previous five days.

Sincerely,
PARAMETRIX, INC.

Peter Battuello
Project Manager
